

Encap Series Screw Air Compressors

Essentials encapsulated

15-30 kW

with **UPTIME** Promise

High reliability

Energy efficient

Low cost of ownership

Ease of maintenance

Compact and Silent

Encap series - Everything you need in a compressor

Packed full of performance, the EN Series uses the world-class technology found in our large industrial grade compressors. This includes proprietary airends, after-coolers and electronic controllers. The EN Series integrates major systems such as air intake system, compression system and oil separation system into one robust, encapsulated system. This simplified design results in a leak-free, silent and energy saving system that keeps your business up and running.

Integrated into the encapsulated airend are major components such as air-filters, air-intake valve, solenoid valve, air-oil separator tank, oil separator element, oil filter, safety valve, oil sight glass, minimum pressure valve, oil drain valve, thermostatic valve and blow down valve.

ELGi Brand Support

Our Uptime brand is supported, and held up, by three strong pillars:

- UPTIME Design**
 This speaks to the engineering and design of our products. Our R&D is dedicated to designing machines that run cooler, cleaner and longer... that are easy to service... with longer service intervals. Our commitment to an UPTIME DESIGN.
- UPTIME Components**
 For so many of our customers, seeing is believing. They know a quality-built machine when they see it. That's why every part on a ELGi compressor is a quality part. From our proprietary air ends, to our use of leak-free hoses and piping.
- UPTIME Assurance**
 Here is where we back our pledge, with industry-leading warranties, parts availability, loaner machines and call centers staffed by experts. All with the peace-of-mind customers have knowing their compressor is assembled locally.
